

ORCHESTRATED Data Leakage Solution

The GLESEC Orchestrated Data Leakage Solution is a continuously managed and optimized process to address data leakage prevention, detection and protection as a security breach and as a compliance risk.

Unique Capabilities :

Completely respond to GDPR and other laws for privacy providing immediate alert, visibility, and reporting.

Easy SaaS deployment and no agents required.

Facilitates internal employees' engagement through behavioral change.

Protects all data in multiple clouds and on-premises without the need to classify this data.

Why Choose GLESEC for Data Leakage Solutions?

GLESEC's Orchestrated Data Leakage Solution integrates DLP detection, protection, and verification within its Threat Mitigation Lifecycle. Using its Orchestration Platform and Dynamic GAP Analysis, it provides risk visibility, compliance tracking, and real-time leakage detection. Analysts investigate threats, block exfiltration, and ensure compliance through timely reporting and security alignment.

Secure your data with GLESEC's advanced DLP solution today!
