

SKYWATCH

Continuous Application Protection Solution (CAP)

What CAP Is?

SKYWATCH CAP is a cloud-based, fully managed RISK compliant solution protecting Internet-facing applications from DoS, API, BOT, and web attacks, ensuring real-time threat mitigation, operational efficiency, and tailored security.

Key Features :

Operational Efficiency

Device-Centric Protection

Real-time Risk and Threat
Monitoring

Cloud-Based, Hassle-Free
Deployment

24/7 Managed Services

Cost-Effective

How Does It Work?

SKYWATCH CAP continuously assesses, monitors, and mitigates risks with an integrated framework for operational efficiency. Using advanced tools and a Device-Centric Model, it prioritizes protections, detects threats, and ensures 24/7 security with proactive SOC analysis and rapid incident resolution.

Why Choose Skywatch CAP?

- **Operational Efficiency:** Resolve vulnerabilities and mitigate threats faster with streamlined workflows and tailored protection.
- **Tailored Protection:** Safeguard each asset with customized, device-centric security strategies.
- **Unified Platform:** Simplify your cybersecurity with full visibility and management in one dashboard.
- **Proactive Protection:** Stay ahead of emerging threats with continuous monitoring and real-time response.
- **Budget-Friendly:** Reduce costs without sacrificing quality, thanks to our integrated technologies and expert teams.
- **Peace of Mind:** Focus on your core business while we safeguard your digital assets.
